REASONS FOR ALLOWANCE

Claims 1-3, and 154-166 are allowed.

The following is an examiner's statement of reasons for allowance:

The above-mentioned claims are allowable over the Cited Prior Art (CPA), Vanstone et al. (U.S. Patent 6,487,660) in view of Bellovin et al. (U.S. Patent 5,241,599), because the CPA does not teach nor suggest all the limitations of the independent claims 1 and 154, and the subsequent dependent claims.

The CPA does not explicitly teach a method for establishing secure communication by transmitting from one party to another, a first encrypted message including a random number and a public key of an asymmetric key pair which is generated/retrieved at the first party, wherein the first message is encrypted with an encoded password known to both parties, wherein the second party receives and decrypts the first message using the encoded password to retrieve the first random number and a public key, and a second encrypted message is sent from the second party to the first party which includes a second random number, wherein the second message is encrypted with the public key of the asymmetric key pair, and the first party receives and decrypts the second encrypted message to retrieve the second random number, and each party uses the random numbers to generate a shared secret key.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
